

Grey NFT

About Us

We are a team of analysts who have studied the cryptocurrency market for a while. Our study has made us realize future potential threats to the growth of the NFT market. Many NFTs we see now will end up as decors in so many wallets, and it requires only a team that has planned for the future that can make necessary innovations to make NFTs continue to be relevant to the crypto currency space

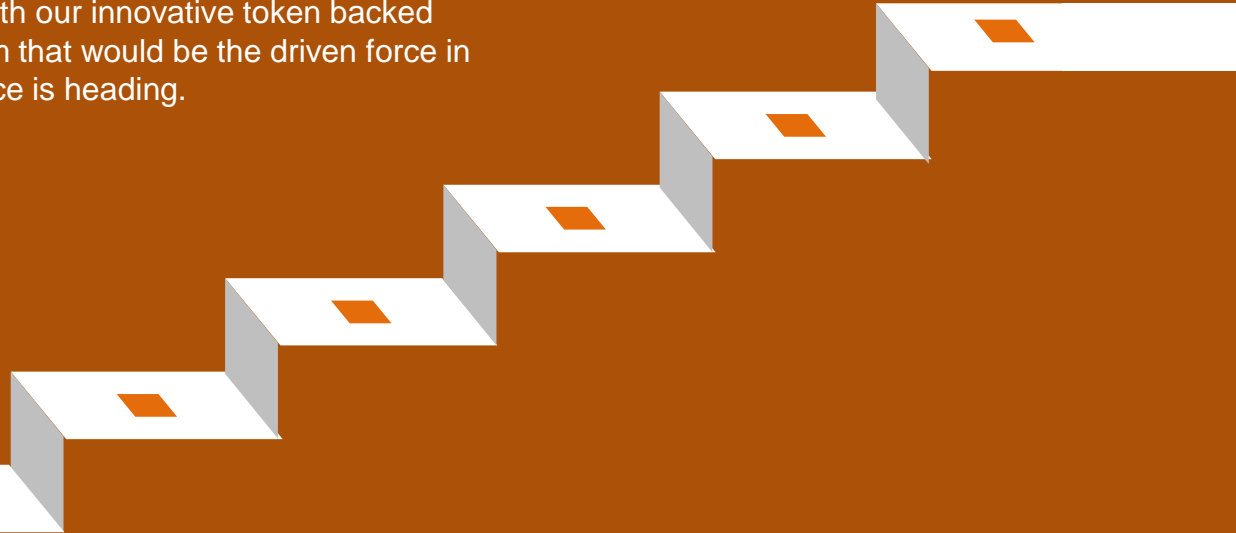

Our Mission

Growth%

The aim of every investor is to realize profit, our mission is to satisfy that desire

We plan to achieve this with our innovative token backed by our metaverse museum that would be the driven force in the direction the NFT space is heading.

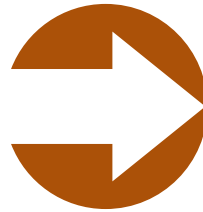

Market Problem

Not long ago, NFT became a trend, news of non-fungible tokens bought for a few cents being flipped for a million dollars spread like wildfire and FOMO! was created an Influx of people into the space trying to get a slice of the cake. But then weed began to spin off amongst the wheat, figuring out the right NFT to mint might take hours and extra knowledge than otherwise required to mint or purchase.

NFTS are gaining alot of traction in the Crypto space, but due to their illiquid nature, it poses a problem for investors. As the goal for every investment is to reap profits, collectors who collect alot of NFTs are faced with the challenge of

Not being able to instantly sell/buy out of a NFT/community with no hype or utility. A bad investment

Our Solution

We're here to innovate, iterate and solve what we believe are flaws in a disruptive innovation that has unlimited potential in the long term and add our vision and expertise onto it.

Although many can argue that the solution would be to work with NFTs with a use-case which is true, we have also decided to add unique utilities to the museum to cub the matters stated. However these idea would be rolled out in the V2 of this whitepaper

GREY NFT Features

To ensure the participation and engagement of the entire ecosystem we have set up the following features that define GreyNFT as a next-generation NFT project;

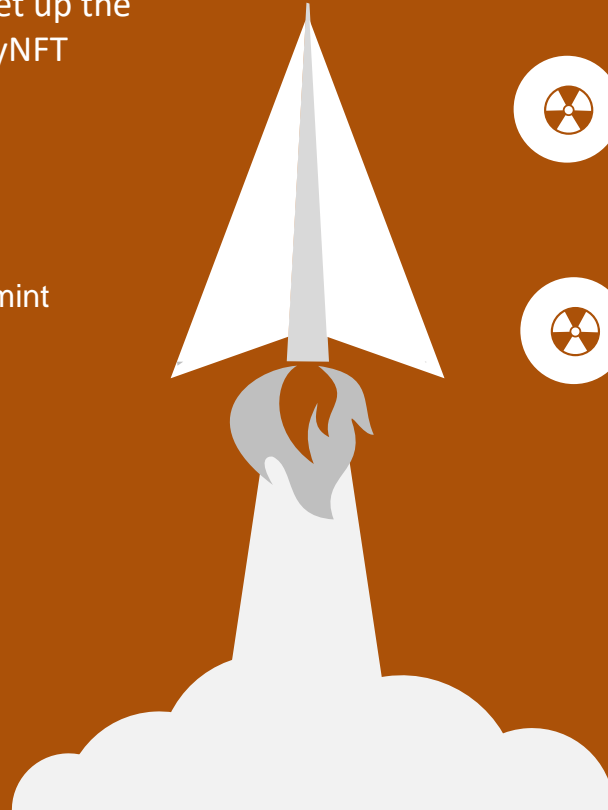

Cross-chain: Ability for NFT mint events to occur on multiple blockchains and not just AlephZero

Grey Pass: Grey pass grants you access to the museum and allows you to earn grey tokens for time spent in the museum. You also get to participate in hunts and get other rewards

Grey Token: A community-backed token that is used for transacting in the museum

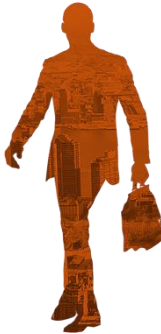

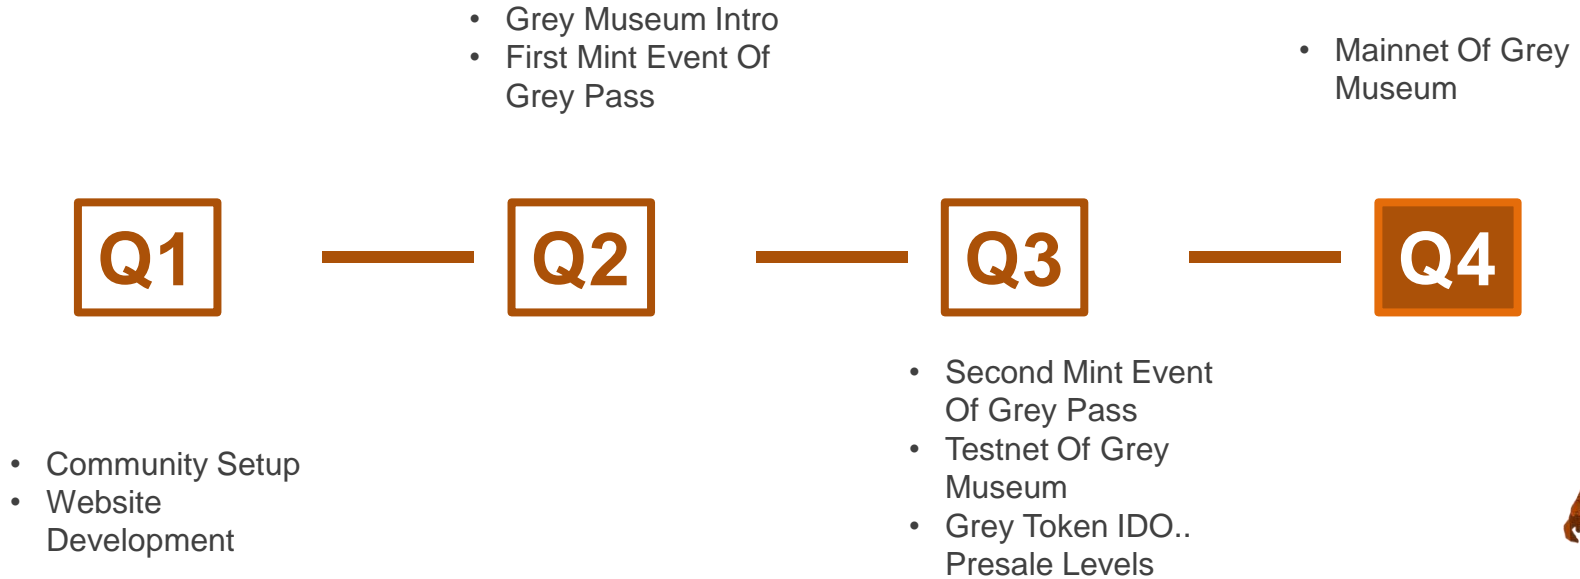

Target Market

Our targeted market is not limited to one blockchain, although we are starting with the Alephzero blockchain and would gradually expand. Our overall goal is to gradually get more holders via our marketing strategies who will increase the strength and the add value to our product
